Factory operating

connect IR in DVD or other external device to T6, then choose the type of external by switch on T6, thus you can control external device by MMI keys
special tip 1 : how to find IR cable

- when DVD in operating, use voltmeter to test cables which related with DVD plug (cable related to remote is +5V or +3.3V, ground and signal cable, and this signal cable is right IR cable)
- when you find cable with voltage 3-5V by voltmeter, then when you control DVD by remote, the voltmeter will vibrate a little for 5V, so this cable will be IR cable for DVD player.
